

Gates COVID-19 Tracker, Week 1 - National

This document includes toplines for 7,369 responses to the Gates COVID-19 Tracker fielded April 2-4, 2020. This includes 5,114 responses collected across the U.S., with oversamples in the states of Washington, New York, and Florida (747, 755, and 753 responses, respectively). The toplines report on the percentage of survey-takers who selected each response, weighted to the U.S. general population (adults aged 18+) in Civis' consumer file.

Each question is labeled by its question tag (which was included in the Questionnaire document in brackets) and the question text. Some questions were only shown to a subset of respondents; the number of responses to each question is indicated by "N = " in the label. A description of the subset who were shown the question is also included below the question text, indicated by "Displayed if:" or "Shown to."
