

Gates COVID-19 Tracker, Week 6 - National

This document includes selected crosstabs for 8714 responses to the Gates COVID-19 Tracker fielded May 22-26, 2020. This includes 4974 responses collected across the U.S., with oversamples in the states of Florida, New York, Ohio, Texas, and Washington (734, 753, 749, 760, and 744 responses, respectively). The crosstabs report on the percentage of survey-takers who selected each response, weighted to the relevant demographic or geographic subgroup within the U.S. general population (adults aged 18+) in Civis' consumer file.

Each question is labeled by its question tag (which was included in the Questionnaire document in brackets) and the question text. Some questions were only shown to a subset of respondents; the number of responses to each question is indicated by "N = " in the label, and the number of responses within each subgroup is indicated in the "Total Count" column. A description of the subset who were shown the question is also included below the question text, indicated by "Displayed if:" or "Shown to."
