

## Gates COVID-19 Tracker, Wave 8 - National

---

This document includes topline for 8756 responses to the Gates COVID-19 Tracker fielded June 25-29, 2020. This includes 5010 responses collected across the U.S., with oversamples in the states of Florida, New York, Ohio, Texas, and Washington (733, 755, 758, 759, and 741 responses, respectively). The topline report on the percentage of survey-takers who selected each response, weighted to the U.S. general population (adults aged 18+) in Civis' consumer file.

Each question is labeled by its question tag (which was included in the Questionnaire document in brackets) and the question text. Some questions were only shown to a subset of respondents; the number of responses to each question is indicated by "N =" in the label. A description of the subset who were shown the question is also included below the question text, indicated by "Displayed if:" or "Shown to."

For some questions in the disease tracking section, we've provided two versions of the percentage of survey-takers for questions with display logic where it would be most helpful. On the left, "Percent of asked" represent the percentage of respondents who were asked the question; on the right, "Percent of all resp" represent the percentage of all respondents, with an additional entry for "(Not asked)."

## Covid Contact Tracing Compelling Reasons: N = 8756

Contact tracing is an essential tool used by public health professionals. Trained interviewers contact people with COVID-19 to help them remember who they had close contact with. The interviewers then call those close contacts to notify them of possible exposure. The identity of the person with COVID-19 is kept confidential and never revealed to their contacts. Every person called or interviewed receives information about how to keep themselves and others safe and healthy, and about support resources that are available. Which of the following are the most compelling reasons to cooperate with contact tracers? Select all that apply.

Margin of error = 1.3%

Reason	Selected
Contact tracing helps slow the spread of COVID-19	45.4%
Contact tracing helps the economy stay open	22.6%
Contact tracing helps prevent another stay-at-home order	27.8%
Contact tracing finds and isolates new infections before they spread	39.7%
Public health employees regularly use contact tracing to slow the spread of different infectious diseases	28.7%
Contact tracing has been used for decades to combat diseases like tuberculosis, HIV/AIDS, polio and measles	22.3%
Contact tracing is free and provided by health department employees and partners	25.7%
Participation in contact tracing is voluntary	21.3%
The information from contact tracing is strictly confidential and used only to help slow the spread of disease	35.6%
None of the above	13.1%

## Covid Contact Tracing Provide Info Reasons: N = 8756

Which of the following would make you more likely to provide information about your close contacts? Select all that apply.

Margin of error = 1.3%

Reason	Selected
Knowing that the interviewer will never disclose my identity to my close contacts	31.7%
Knowing that public health interviewers do not collect sensitive information, like social security number or immigration status	33.2%
Being contacted by a person or organization that's connected to my community	17.3%
Understanding how the information will be used	39.9%
Understanding why contact tracing is important	36.1%
Knowing that the information is confidential and will not be shared	42.5%
Assurances that it's really the health department and not a scam or a private corporation	36.3%
Knowing my contacts can be tested for free	34.8%
Knowing my contacts can get support services, like grocery delivery, to help them stay at home	28.0%
None of the above	14.1%
