

## COVID-19 Tracker, Wave 10 - National

---

ment includes selected crosstabs for 8,511 responses to the Gates COVID-19 Tracker fielded August 20-23, 2021. The survey collected 4,652 responses across the U.S., with oversamples in the states of Florida, New York, Ohio, Texas, and Washington (772, 808, 751, 775, and 753 responses, respectively). The crosstabs report on the percentage of survey-taker for each response, weighted to the relevant demographic or geographic subgroup within the U.S. general population (as defined in Civis' consumer file). Each question is labeled by its question tag (which was included in the Questionnaire document) and the question text. Some questions were only shown to a subset of respondents; the number of responses to each question is indicated by "N = " in the label, and the number of responses within each subgroup is indicated in the "Total Count" column. A description of the subset who were shown the question is also included below the question text, indicated by "Shown to."

## ted National Crosstabs
