Gates COVID-19 Tracker, Wave 11 - Ohio

This document includes toplines for 750 responses to the Gates COVID-19 Tracker fielded September 17-21, 2020 in the state of Ohio. The toplines report on the percentage of survey-takers who selected each response, weighted to Ohio's general population (adults aged 18+) in Civis' consumer file. National toplines from this week are also provided for each question response for comparison.

Each question is labeled by its question tag (which was included in the Questionnaire document in brackets) and the question text. Some questions were only shown to a subset of respondents; the number of responses to each question is indicated by "N = " in the label. A description of the subset who were shown the question is also included below the question text, indicated by "Displayed if:" or "Shown to."

For some questions in the disease tracking section, we've provided two versions of the percentage of survey-takers for questions with display logic. On the left, "US (asked)" or "OH (asked)" represent the percentage of respondents who were asked the question; on the right, "US (all resp)" or "OH (all resp)" represent the percentage of all respondents, with an additional entry for "(Not asked)."

Covid Contact Tracing Heard Of: N = 750

Have you heard about contact tracing as a way to help slow the spread of COVID-19?

US Margin of Error = 1.4%, OH Margin of Error = 4.3%

Covid Contact Tracing Heard Of	US	OH
Yes	66.1%	65.6%
No	27.1%	28.4%
I don't know	6.8%	5.9%

Covid Contact Tracing Compelling Reasons: N = 750

Contact tracing is an essential tool used by public health professionals. Trained interviewers contact people with COVID-19 to help them remember who they had close contact with. The interviewers then call those close contacts to notify them of possible exposure. The identity of the person with COVID-19 is kept confidential and never revealed to their contacts. Every person called or interviewed receives information about how to keep themselves and others safe and healthy, and about support resources that are available. Which of the following are the most compelling reasons to cooperate with contact tracers? Select all that apply.

US Margin of Error = 1.4%, OH Margin of Error = 4.3%

Reason	US	OH
Contact tracing helps slow the spread of COVID-19	46.2%	45.3%
Contact tracing helps the economy stay open	24.0%	25.1%
Contact tracing helps prevent another stay-at-home order	28.2%	28.0%
Contact tracing finds and isolates new infections before they spread	38.7%	38.3%
Public health employees regularly use contact tracing to slow the spread of different infectious diseases	29.8%	28.6%
Contact tracing has been used for decades to combat diseases like tuberculosis, HIV/AIDS, polio and measles	23.5%	23.2%
Contact tracing is free and provided by health department employees and partners	25.9%	25.2%
Participation in contact tracing is voluntary	21.0%	21.6%
The information from contact tracing is strictly confidential and used only to help slow the spread of disease	35.3%	35.6%
None of the above	12.7%	14.1%

CIVIS

Covid Contact Tracing Provide Info Reasons: N = 750

Which of the following would make you more likely to provide information about your close contacts? Select all that apply.

US Margin of Error = 1.4%, OH Margin of Error = 4.3%

Reason	US	OH
Knowing that the interviewer will never disclose my identity to my close contacts	31.9%	30.2%
Knowing that public health interviewers do not collect sensitive information, like social security number or immigration status	33.5%	32.4%
Being contacted by a person or organization that's connected to my community	19.0%	16.9%
Understanding how the information will be used	37.9%	37.4%
Understanding why contact tracing is important	35.1%	36.8%
Knowing that the information is confidential and will not be shared	41.5%	41.8%
Assurances that it's really the health department and not a scam or a private corporation	33.8%	33.0%
Knowing my contacts can be tested for free	34.3%	33.8%
Knowing my contacts can get support services, like grocery delivery, to help them stay at home	29.5%	29.9%
None of the above	13.5%	16.7%

Covid College Surges: N = 750

As you may have seen in the news, cases of coronavirus (COVID-19) have been increasing in recent weeks in some areas, particularly around college campuses. Has this news made you more or less concerned about the Coronavirus pandemic?

US Margin of Error = 1.4%, OH Margin of Error = 4.3%

Covid College Surges	US	OH
More concerned than before	52.0%	45.5%
Neither more nor less concerned	42.1%	48.0%
Less concerned than before	5.6%	6.2%

Coronavirus College Surges Reason: N = 750

In your opinion, which of the following is the most important factor contributing toward the increase in COVID-19 cases around college campuses?

US Margin of Error = 1.4%, OH Margin of Error = 4.3%

Coronavirus College Surges Reason	US	OH
The federal government has not set appropriate guidelines for all campuses to follow.	12.8%	9.0%
Colleges and universities did not put into place necessary precautions for students to return to campus.	13.1%	9.6%
Students are being irresponsible and not following guidelines set by their college or university.	40.0%	43.9%
The spread of COVID-19 has been unpredictable, and we don't know why college campuses are currently hotspots.	13.1%	13.9%
There are not more cases of COVID-19 in those areas. The increased numbers are only because of more testing.	11.1%	12.7%
Other:	1.4%	1.1%
None of the above	8.6%	9.8%

Coronavirus Recent News: N = 750

How much have you seen, read, or heard over the past week about the following issues?
