

Gates COVID-19 Tracker, Wave 20 - National - Attitudes, Behaviors, & Concern Level Questions by Race, Education, Urbanicity, and Vaccination Status

This document includes selected crosstabs for 4389 responses to the Gates COVID-19 Tracker fielded August 23-24, 2021, collected across the U.S. The crosstabs report on the percentage of survey-takers who selected each response, weighted to the relevant demographic or geographic subgroup within the U.S. general population (adults aged 18+) in Civis' consumer file. Each question is labeled by its question tag (which was included in the Questionnaire document in brackets) and the question text. Some questions were only shown to a subset of respondents; the number of responses to each question is indicated by "N = " in the label, and the number of responses within each subgroup is indicated in the "Total Count" column. A description of the subset who were shown the question is also included below the question text, indicated by "Displayed if:" or "Shown to."
