

## Gates COVID-19 Tracker, Wave 21 - National - Personal Vaccination Questions by Race, Education, & Urbanicity

---

This document includes selected crosstabs for 8217 responses, collected across the U.S., to the Gates COVID-19 Tracker fielded September 16-19, 2021. This includes oversamples in the states of Florida, New York, Ohio, Texas, and Washington (1100, 1052, 877, 1226, and 1116 responses, respectively). The crosstabs report on the percentage of survey-takers who selected each response, weighted to the relevant demographic or geographic subgroup within the U.S. general population (adults aged 18+) in Civis' consumer file. Each question is labeled by its question tag (which was included in the Questionnaire document in brackets) and the question text. Some questions were only shown to a subset of respondents; the number of responses to each question is indicated by "N = " in the label, and the number of responses within each subgroup is indicated in the "Total Count" column. A description of the subset who were shown the question is also included below the question text, indicated by "Displayed if:" or "Shown to."
